Core stability stresses the importance of the body's center of power. The core is the foundation for all movement. ## **CROSS-TRAINING CLASSES**

Cross-training is the way to give yourself a full body workout. In cross-training, two or more types of exercise are performed in one workout. Cross-training offers great advantages: adds variety to your workouts to keep you interested and progressing; develops your entire body, rather than specific body parts or energy systems (aerobic vs anaerobic); distributes the load of training among various body parts, thus reducing the risk of injury; and maximizes your time. We have the most diverse and effective cross-training classes of any club in the area.
